

Basic Guidewire, Catheter, and Imaging Skills Training Course for the Cardiac Surgeon

This Medtronic EDGESM course is a skills-based training program specifically designed to make you more competitive today and in the future.

Medtronic Cardiac Surgery invites you to participate in this unique SkillTracSM hands-on training course presenting an introduction to guidewire, catheter, and imaging devices. Basic procedural skills, technologies, and techniques will also be covered. This course is the first of several steps needed for you to become proficient in performing catheter and guidewire-based procedures, helping you to build the foundation for developing core competencies in the treatment of structural heart disease and other guidewire and catheter-based procedures.

Presented by Medtronic Cardiac Surgery

Expand your skills. Control your future.

Presented by

Medtronic Cardiac Surgery

Medtronic's Physiological Research Laboratory (PRL) is a world-renowned training facility for classroom, procedural simulation, and other hands-on oriented training activities.

Our exclusive training simulators provide unique tools to build guidewire and catheter dexterity as well as imaging skills.

COMMITTED TO THE CARDIAC SURGEON

Enhance your practice with such topics as:

- Introduction to the Hybrid Suite for the cardiac surgeon
- Summary of your role in this new environment
- Overview of procedural imaging techniques
- Introduction to basic guidewire and catheter devices
- Guidewire and catheter basic procedural employment
- Procedural simulation exercise module on Medtronic simulators
- Special devices for structural heart disease treatment
- Didactic procedural introduction and overview
- Procedural complication resolution techniques

Skills-based training tools

In this hands-on course, you'll be able to work in our skills-based learning environment with the latest devices, training simulation, and support products. They include, but are not limited to:

- Diagnostic guidewires
- Diagnostic catheters
- Angioplasty balloon catheters
- Infusion catheters
- Stents
- Introducer sheaths
- Guide of catheters
- Contrast agents
- Imaging tools
- Retrieval devices

Distinguished faculty

Experienced cardiac surgeons, radiologic technologists, and other healthcare professionals proficient in guidewire and catheter techniques will provide hands-on, skills-based training designed specifically for cardiac surgeons.

Register today

Registration fee (\$995 per person; \$895 for STS member) includes:

- Course tuition
- Training devices and tools
- Course handouts and instructional handbook
- Instruction by cardiac surgeons and support staff
- Guidewire and catheter simulation fees
- All meals during class time
- Return ground transportation to airport

Registration fee does not include:

- Air fare
- Lodging for one night
- In-bound ground transportation

FEES: All fees drawn on U.S. bank in U.S. dollars. Checks should be payable to Medtronic, Inc. —EDGE Basic Guidewire, Catheter, and Imaging Skills Training. American Express, MasterCard, VISA and Discover cards also accepted.
