

CG FUTURE® COMPOSITE RING

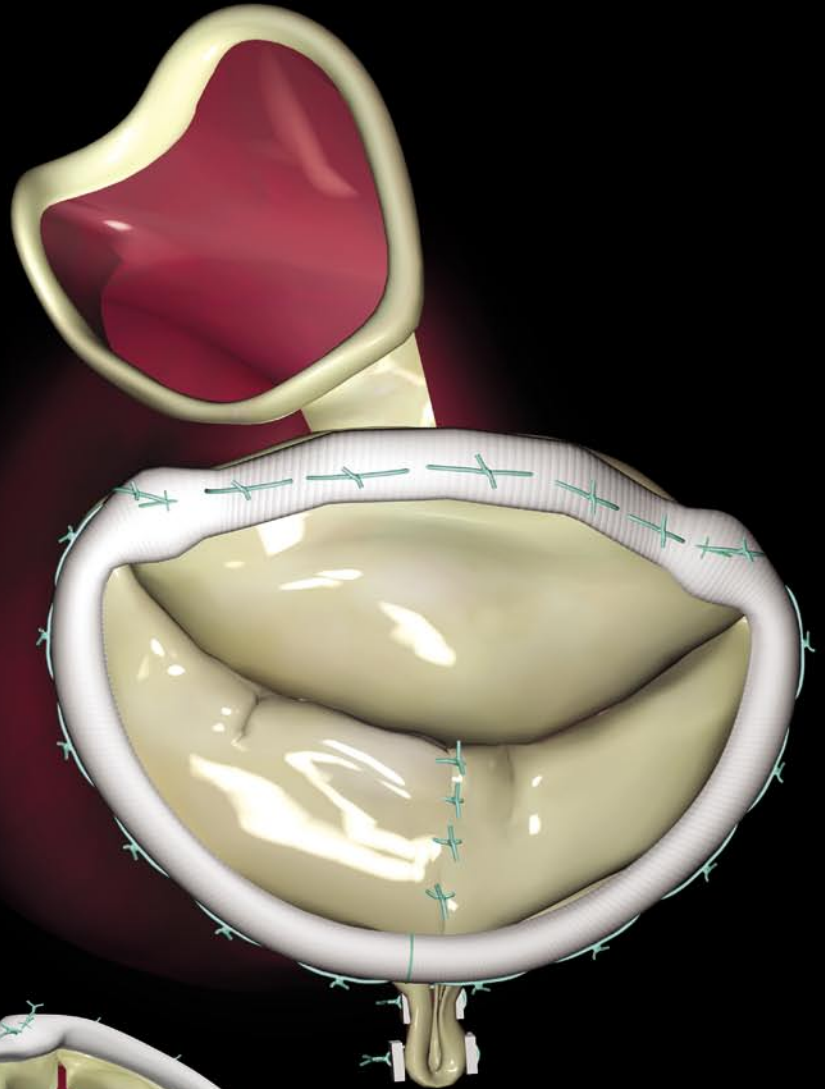

Mitral annulus movement is closely related to aortic root dynamics — the correct function of one valve requires the integrity of the other. Introducing the first composite ring to offer posterior remodeling while maintaining anterior flexibility, restoring dynamic annular motion.

Unique COMPOSITE design
for dynamic mitral repair.

for yourself.

CG Future® Annuloplasty System: Indications: This device is indicated for the reconstruction and/or remodeling of pathological mitral valves. Valvular insufficiency and/or stenosis may be corrected by appropriate repair and annular remodeling. Contraindications: Heavily calcified valves, valvular retraction with severely reduced mobility, active bacterial endocarditis. Warnings/Precautions/Adverse Events: Only physicians who have received proper training in valve repair should use this device. Adverse events can include: thromboembolic events, dehiscence, hemolysis, stenosis, residual incompetence, heart block, endocarditis, systolic anterior motion, left ventricular outflow tract obstruction, anticoagulant-related bleeding or hemorrhage. For additional information please refer to the Instructions for Use provided with the product or contact your local Medtronic representative.

CAUTION: Federal law (USA) restricts this device to sale by or on the order of a physician.
